WEBSITE MOCKUPS

Home page

A laptop screen showing a resume template. The title "About Me" is at the top. Below it is a paragraph about the author, Al Mobarak, a Software Engineering student at KFUPM. To the right is a circular profile picture of a person wearing a hijab. At the bottom left is a section titled "Technical Skills" with a list of ten skills in blue rounded rectangles: Java, C#, Assembly, UI Design, Graphic Design, GitHub, CSS, JavaScript, 3D Design, and Game Development.

About Me

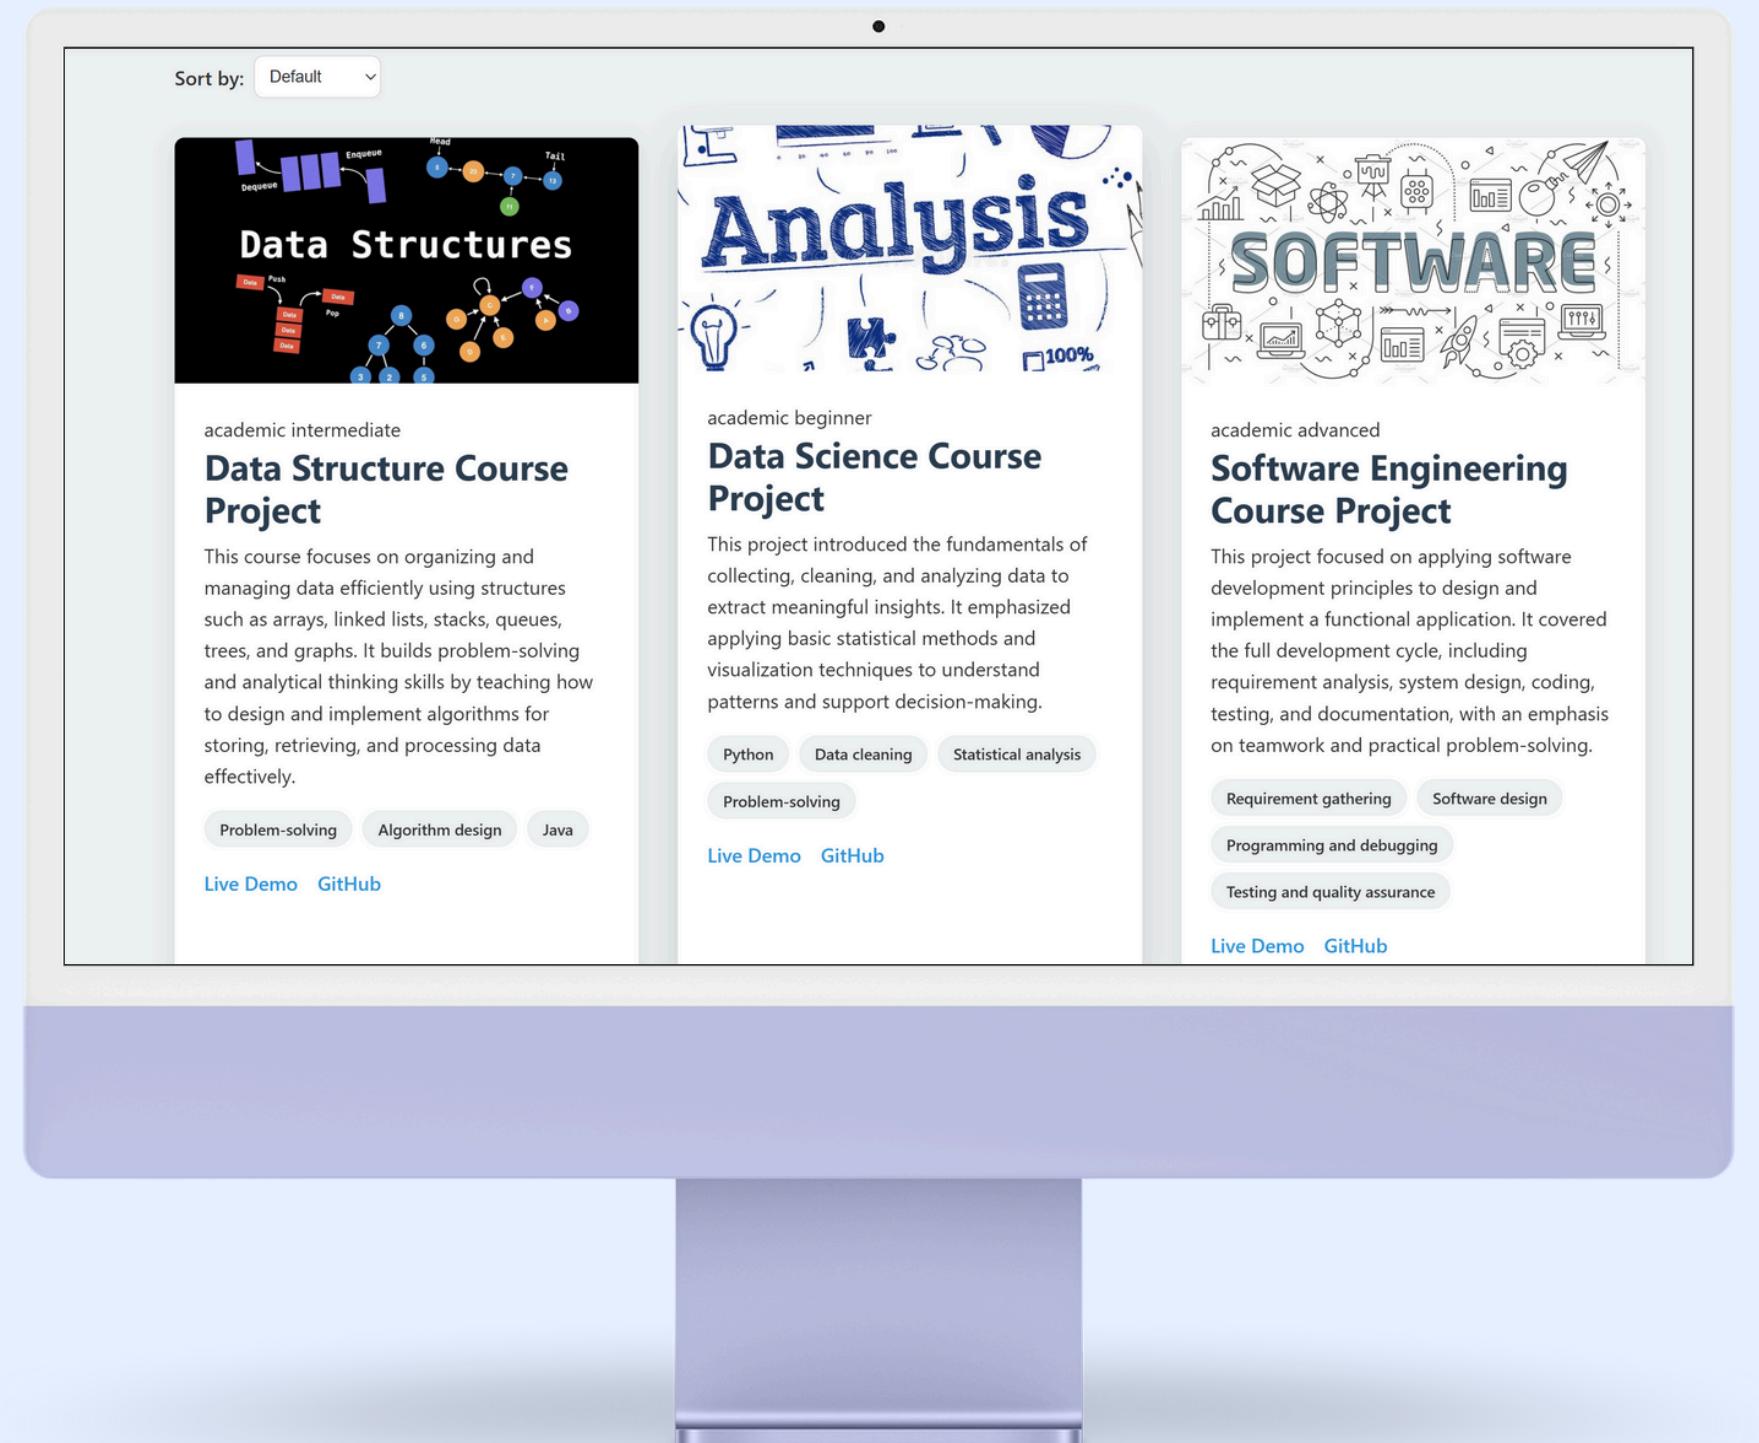

I am Al Mobarak, a Software Engineering student at KFUPM with a strong passion for programming, solving, and creative design. My academic background has equipped me with knowledge in data algorithms, digital logic, and data science, while also strengthening my skills in Python, Java, C++, and assembly coding. Beyond technical expertise, I have hands-on experience in graphic design through my involvement with the Art Club, where I enhanced my creativity and teamwork abilities. I am bridging technical skills with design to build efficient, user-friendly solutions, and I am eager to continue developing as a software engineer who bridges innovation with practical impact.

Technical Skills

Java, C#, Assembly, UI Design, Graphic Design, GitHub, CSS, JavaScript, 3D Design, Game Development

GitHub repositories

The image shows a laptop screen displaying a contact form. The title "Get In Touch" is at the top. Below it, a section titled "Let's work together!" contains the text "I'm always interested in new opportunities and collaborations." followed by an email address (marzakmbk10@gmail.com) and a phone number (0570870026). A location indicator shows "Safwa, Saudi Arabia". A "Site Analytics" section shows three metrics: "Total Visits" (3), "Current Visit" (3m 32s), and "Projects Viewed" (0). The main contact form includes fields for "Name *", "Email *", "Subject" (with a dropdown menu "Select a subject"), and "Message *". A blue "Send Message" button is at the bottom.

Get In Touch

Let's work together!

I'm always interested in new opportunities and collaborations.

Technical Architecture

- HTML for content
- CSS for styling and layout
- JavaScript for interactivity
- Organized folder structure
- Optimized images for fast loading

Challenges

- Making the layout fully responsive
- Debugging CSS alignment issues
- Creating smooth animations
- Deploying correctly on Netlify

NEXT

CONCLUSION

Conclusion

Achieved:

- Built and deployed a complete portfolio
- Improved front-end development skills
- Created a platform to showcase my work
